Hi Eric: I just looked in my mining parts box and guess what, I do have some weights left. There are twelve different sizes and types. As I remember I paid fifteen dollars for them. You can have them for the fifteen dollars plus $3.85 priority mail. Also a little box with a couple of weights. I will send them to you after the July4th holladay. If these are not what you want just send them back. Best regards, David

ps: be sure to look in the little white envelope has gns weights.
